

Syed Waliullah

 inanewali |  inanewali |  syed.waliullah@ucalgary.ca |  hive-roomies.com

Summary

Software Engineering student (UCalgary, Expected 2027) with hands-on experience building analytics pipelines, dashboards, and full-stack web applications. Proven ability to ingest, clean, and transform large datasets into reliable insights using Python, SQL, Power BI, and Power Query. Shipped a live production app (Hive) with a team of 6 using React, Next.js, and Supabase. Strong attention to detail and a focus on reproducible, well-documented systems.

Work Experience

Junior IT Consultant — IT Audit & Data Analytics – Hoda Vasi Chowdhury & Co. (Chartered Accountants) *May 2025 – Aug 2025*

- Processed **100k+** journals and full-year ledgers for audit planning and risk assessment across banking and manufacturing clients.
- Built Power Query ingestion pipelines and Power BI anomaly dashboards, cutting data prep time **40–60%** and surfacing **<5%** high-risk transactions.
- Delivered structured exception summaries that reduced manual journal testing by **30–50%** and maintained full traceability to source documents.
- Coordinated findings reports and technical documentation for Engineering Managers and senior stakeholders across multiple concurrent engagements.

Data Analyst / Software Engineer Intern – AC-Robotics, Calgary, AB

Feb 2022 – Apr 2022

- Improved data logging efficiency by implementing structured SQL database storage and PowerShell automation for sensor data collection and system health reporting.
- Developed Python-based automation for robotics control and diagnostics, integrated with Azure-compatible data pipelines.
- Delivered reporting with **100% traceability** across cross-functional engineering teams using SQL-based analytics.

Visual Effects Artist – University of Calgary Solar Car Team

Oct 2024 – Apr 2025

- Reviewed engineering drawings and technical specifications to produce accurate 3D models using AutoCAD and Blender.
- Coordinated design integration across mechanical and electrical engineering disciplines to ensure visual accuracy.

Customer Service Supervisor – University of Calgary (Active Living)

Oct 2025 – Present

- Supervise front desk operations, coordinate scheduling, and handle escalations across a high-traffic service environment.
- Maintain accurate records in SharePoint and draft SOPs to ensure consistent, accurate information across the team.

Selected Projects

Hive – Roommate Management Platform  *Next.js, React, TypeScript, Supabase — Jan 2026 – Apr 2026*

- Built and shipped a production-ready roommate management app with a 6-person team on a structured 10-week timeline — deployed and live at hive-roomies.com.
- Owned the **expenses**, **user profile**, and **settings** features end-to-end: expense splitting with real-time settlement tracking, auth-aware profile persistence, and full settings management via Supabase.

Automated Audit Sampling Tool  *github*

Python, Excel, ETL — Jan 2026 – Present

- Developing a data pipeline with automated classification, value-band stratification, and risk-based sampling rules for **10k–50k+** transaction sets.
- Ensures **100% traceability** to source ledgers; targeting **~50%** reduction in manual audit sampling time.

Quantitative ETF Forecasting System  *github*

Python, ARIMA, LSTM, Scikit-learn

- Automated data pipeline from Yahoo Finance; modular EDA → feature engineering → model training flow.
- Implemented ARIMA, LSTM, and tree-based classifiers with comparative backtesting and reproducible metrics reporting.

Network Intrusion Detection System

Python, Scikit-learn, Pandas

- Built Decision Tree and Random Forest classifiers on the NSL-KDD dataset; preprocessed with Pandas/NumPy, documented with performance visualizations.

Business Operations Reporting System

Python, SQL Server, T-SQL, Excel

- End-to-end ETL pipeline with Pandas data quality validation, T-SQL scheduled reports, and structured analytics; reduced manual reporting effort significantly.

Flight Management System  *github*

C++, SQL

- Designed relational schema, reporting queries, and analytical reports to validate system correctness and operational consistency.

Education

University of Calgary – Bachelor of Science in Software Engineering *Expected 2027*
Relevant coursework: Data Structures & Algorithms, Software Architecture, Database Systems, Machine Learning, Project Management, Engineering Economics

Certifications & Awards

Career Essentials in Data Analysis – Microsoft & LinkedIn Learning *Feb 2026*
Data Analytics Job Simulation – Deloitte Australia (Forage) *Feb 2026*
Duke of Edinburgh’s International Award – Silver & Bronze Certificates *2020 – 2021*
GCE A-Level & O-Level – Cambridge International Education *2019 – 2020*

Skills

Programming	Python, SQL, JavaScript, TypeScript, C++, C#, Java, HTML/CSS, Flask, React, Next.js
Data & Analytics	Pandas, NumPy, Power BI (DAX, dashboards), Power Query, EDA, Data Cleaning, Visualization
Databases	SQL Server, MySQL, SQLite, Supabase, Data Modeling, Query Optimization
Machine Learning	Scikit-learn, ARIMA, LSTM, Feature Engineering, Model Evaluation, Backtesting
Tools & Platforms	Excel (PivotTables, VLOOKUP), Power Automate, SharePoint, AutoCAD, Blender, Git
